

35 BIOLOGY LESSON PLAN 5/8-5/12

Monday- Quiz- 35.1,.2

Discussion-Robert Koch helped establish how we study and identify disease causing entities. Our ability to fight disease is the function of our immune system which is humoral and cell-mediated specifically.

Homework-35.3

Tuesday- Quiz-35.3

Discussion- How can humans acquire immunity without being exposed to the actual disease causing agent? Passive immunity can give short term help but active immunity is more common.

Homework- 35.4

Wed./Thurs. Block- Quiz-35.4

Discussion- What are some disorders of the immune system?

Homework-SFT

Lab- Viral Transmission Lab

Friday- Test- Immune System and Disease chpt35

Discussion

Homework- Study Unit One
